

Science Creative Homework Year 5

To be brought to school by Friday 19th October 2018

Design and/or make a flower to attract insects for pollination.

Go for a walk and collect different seeds. See if you can sort and identify the seeds. Bring the seeds into school or sketch them.

Design a habitat for an animal you have thought up. The animal can be a mash up of different animals. Think about why it needs to live in that habitat due to the conditions it needs to survive.

Draw an image of your favourite living thing using paint / pencils / black and white image/ collage.

Create a presentation on the life cycle of an animal.

Design your own 'fantastic beast' that lives in the Forbidden Forest. Create a fact file.

Make a 3D animal of your choice using any materials of your choice.

Take a nature walk around your local area (with an adult). Make a list of all the living things you see. Produce a report to tell the rest of the class what you saw.
